by Barry A. Farber, PhD. (242 p.) # 7145 **Reg. Price \$89.95**  
7 Contact Hours NBCC **Save \$14!** **Now \$75.95**

Self-disclosure is a very hot, current topic. Rich with detailed case material, the book tackles such compelling questions as: • When and how self-revelation can enhance healing and change • What types of disclosure may be harmful • Why either party may fail to reveal important information • The impact on disclosure of race, gender, cultural, and sexual orientation • How to use disclosure to strengthen the therapeutic relationship • Special considerations involved in disclosing to children.

A separate chapter discusses supervision, covering how supervisors and supervisees decide what to share with each other, what kinds of disclosures each is likely to find helpful or unhelpful, and how this issue affects the quality of the alliance and the work that is accomplished.

*Principles and Techniques for Mental Health Clinicians*  
by James Morrison, MD (316 p.) # 7331 **Save \$12!**  
6 Contact Hours NBCC NASW approved **Now \$67.95**

This authoritative, user-friendly book is your primer to the art and science of mental health diagnosis. James Morrison, the author of the bestselling *DSM-IV Made Easy*, systematically takes the reader through every step of the process. He provides clear-cut principles and decision trees for evaluating information from a variety of sources and for constructing a valid working diagnosis that serves as a foundation for treatment. Special features include quick-reference tables, sidebars, explaining key concepts, and over 100 case examples that bring the approach to life.

## COGNITIVE THERAPY FOR OBSESSIVE-COMPULSIVE DISORDER: A GUIDE FOR PROFESSIONALS **Save \$16!**

by Sabine Wilhelm, PhD; Gail S. Steketee, PhD. **Reg. Price \$79.95**  
6 Contact Hours (242 p.) # 7345 NBCC **Now \$63.95**

This manual presents for the first time a purely cognitive approach to treating obsessive-compulsive disorder (OCD). This approach avoids the highly distressing exposure component of exposure and response prevention therapy (ERP) that is commonly used to treat the symptoms of OCD. Not only does this cognitive therapy (CT) approach open up the option of psychotherapy to those OCD sufferers who resist exposure-based therapy, it also holds great promise for treating OCD sufferers with mental rituals as well as those who struggle concurrently with depression, anxiety, and other symptoms.

In this innovative text, case studies of clients representing many different cultural, racial, and ethnic backgrounds illustrate the subtle dimensions of counseling culturally different clients. Case topics discussed include sexual orientation issues, conflicts within cultures, abuse, violence, physical disability, grief, and more. In each case, the client's history is presented, followed by three analyses: The first analysis is from a conceptual perspective, the second is from an existential perspective; and the third is based on the DSM-IV diagnostic model.
